Welcome to the Frontpage

Welcome to Joomla!

Written by Marilyn K.

Thursday, 12 October 2006 10:00

Joomla! is a free open source framework and content publishing system designed for quickly creating highly interactive multi-language Web sites, online communities, media portals, blogs and eCommerce applications.

Powered by Joomla! version 1.5

Joomla! provides an easy-to-use graphical user interface that simplifies the management and publishing of large volumes of content including HTML, documents, and rich media. Joomla! is used by organisations of all sizes for Public Web sites, Intranets, and Extranets and is supported by a community of thousands of users.

Joomla Community Portal Online

Written by Marilyn K.

Wednesday, 07 July 2004 09:54

The newÂ Joomla Community PortalÂ is now online.Â The Joomla Community Portal is a new web site for the Joomla community. There you will find a constant source of information about the activities powering the Joomla Project, learn aboutÂ Joomla EventsÂ worldwide, and see if there is a Joomla User GroupÂ nearby. A new, monthlyÂ Joomla Community MagazineÂ promises an interesting overview of project activities, community accomplishments, and learning material.

What is the FTP layer for?

Written by Marilyn K.

Friday, 06 October 2006 21:27

The FTP Layer allows file operations (such as installing Extensions or updating the main configuration file) without having to make all the folders and files writable. This has been an issue on Linux and other Unix based platforms in respect of file permissions. This makes the site admin's life a lot easier and increases security of the site.

You can check the write status of relevent folders by going to "Help-

The New Joomla Security Strike Team

Written by Marilyn K.

Wednesday, 07 July 2004 09:54

The Joomla Project has assembled a top-notch team of experts to form the new Joomla Security Strike Team. This new team will solely focus on investigating and resolving security issues. Instead of working in relative secrecy, the JSST will have a strong public-facing presence at the newÂ Joomla Security Center.

Only one edit window! How do I create "Read more..."?

Written by Marilyn K.

Friday, 06 October 2006 19:29

This is now implemented by inserting a **Read more...** tag (the button is located below the editor area) a dotted line appears in the edited text showing the split location for the *Read more....* A new Plugin takes care of the rest.

It is worth mentioning that this does not have a negative effect on migrated data from older sites. The new implementation is fully backward compatible.

>System Info" and then in the sub-menu to "Directory Permissions". With the FTP Layer enabled even if all directories are red, Joomla! will operate smoothly.

NOTE: the FTP layer is not required on a Windows host/server.
